

Lightning Strike & Event Counter

Hubbell's Lightning Strike Counter by thermOweld® is designed to register and record lightning strikes where it's installed. There are almost two thousand thunderstorms in progress around the world at any moment. As a result the atmosphere endures around 44 lightning strikes per second, or about 8,640,000 times each day. The information gathered with the Lightning Strike Counter will enhance lightning protection security and increase the effectiveness of inspection and maintenance procedures.

Features

- Detects and records lightning events
- Needs no maintenance
- Easy to install
- Does not require batteries or any external; power supply
- Uses a two conductor wire connection for quick install; included in the kit
- Easy view 7-digit counter
- Durable weather resistant construction
- Anti-UV enclosure with back color
- NEMA 4X/IP67 (IEC 60529:1989+A1:1999)
- Complies with the requirements of UL 94V-0 Flame rated & RoHS
